ZEEKR X: Power consumption combined in kWh/100km: 16,3 – 17,4 (WLTP subject to final homologation), CO2-emissions combined in g/km:0, fuel consumption combined l/100km: 0.

* In Europe all electric vehicles are measured against a standardized metric for range. The Worldwide Harmonized Light Vehicle Test Procedure (WLTP) measures the range of a car travelling at an average speed of 30mph in summer temperatures from a 100% to 0% state of charge. The actual range achieved under real conditions varies depending on driving behaviour and other external factors. The certified WLTP range is therefore normally not achievable in real life.
